PROFILE

Computer Science undergraduate with strong interest in data analysis, AI systems, business intelligence, reporting, and operational problem solving. Skilled in Python, SQL, dashboards, data validation, AI-assisted analysis, and structured documentation. Experienced in converting raw data into insights, identifying patterns, building reports, and supporting decision-making through analytical and technical projects.

EDUCATION

Chitkara University, Punjab, India
B.Tech in Computer Science Engineering

2023 – 2027
CGPA: 8.32

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, SQL
- **Data & Analytics:** Data Cleaning, Data Validation, Reporting, Dashboards, Pattern Recognition, Operational Analysis
- **AI Tools:** ChatGPT, Gemini, AI-assisted Research, Prompting, AI-based Report Generation
- **Frontend & Backend:** React.js, HTML, CSS, Node.js, Express.js, Spring Boot, REST APIs
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
- **Tools:** Git, GitHub, Postman, Jira, Notion, MS Excel, PowerPoint, Maven
- **Cloud & Additional Skills:** AWS Cloud, Azure Fundamentals, API Testing, Debugging, Documentation

PROJECTS

AI Resume Analyzer

Python, Flask, PyPDF2, spaCy, scikit-learn

- Built an AI-assisted resume analysis system to extract resume content, identify skills, and compare profiles with job descriptions.
- Used TF-IDF and cosine similarity to generate match scores and provide structured resume improvement insights.
- Created a workflow for PDF upload, text extraction, skill analysis, grammar feedback, and final reporting.
- Applied data cleaning, text processing, and analytical scoring to convert unstructured resumes into useful insights.
- Strengthened ability to review large text data, detect gaps, and generate decision-support reports.

AEGIS v3 – Global Multi-Domain Threat Detection Platform

React, Node.js, Express, Socket.IO, Leaflet

- Developed a real-time dashboard to monitor global aviation and maritime activity using live data sources.
- Integrated OpenSky and AISHub APIs to collect, structure, and visualize operational data.
- Built AI-generated threat reports to summarize patterns and support faster decision-making.
- Designed dashboards for visibility, tracking, and structured reporting of real-time events.
- Improved analytical thinking by identifying signals from large volumes of live movement data.

Fitness Tracking Application

React, Java

- Created a fitness tracking application with user activity management and progress visualization.
- Built dashboard-style frontend features to display user progress and activity insights.
- Developed backend services to handle user records, activity data, and analytics workflows.
- Applied structured data handling, reporting logic, and user-focused problem solving.

ACHIEVEMENTS

- Solved **280+ Data Structures and Algorithms problems** on LeetCode.
- Secured **3rd Prize at CYBPRO-2025** for an AI-based cybersecurity project.

CERTIFICATIONS

- Java Basic – HackerRank
- SQL Basic – HackerRank
- Python Certification – GeeksforGeeks
- Azure Cloud Fundamentals – Microsoft
- Building Cloud Computing Solutions at Scale – Coursera

SOFT SKILLS

Analytical Thinking Written Communication Attention to Detail Ownership Mindset Problem Solving
Confidentiality Adaptability Cross-functional Collaboration
